PROFILE

Graduate from an engineering program specializing in data science and artificial intelligence, I am available immediately for a first professional opportunity following my end-of-studies internship.

My technical background has enabled me to lead various hands-on projects involving computer vision, NLP, RAG systems (Retrieval-Augmented Generation), classification, reinforcement learning, and end-to-end software development, including the design and creation of applications from scratch.

Curious and highly motivated, I am ready to leverage my data science skills to solve a wide variety of concrete, real-world business problems.

SKILLS

- **Programming** : Python, SQL, C, Java, R, HTML, CSS, TypeScript, Bash
- **Data Analysis** : Advanced statistics, prediction, statistical learning, optimization algorithms...
- **AI** : RAG systems, computer vision (CNN detection, GAN generation), classification, machine learning...
- **Key libraries & frameworks** : pandas, NumPy, scikit-learn, TensorFlow/PyTorch, OpenCV, Matplotlib, Selenium, Streamlit...
- **Tools & environments** : Docker, Poetry, Git, Conda, Expo, Linux
- **Office Suite** : Word, PowerPoint, Excel, Power BI, Photoshop
- **CAD / Design** : SolidWorks, Inventor, Fusion360

LANGUAGES

FRENCH – NATIVE

ENGLISH – C1

SPANISH – B2

Thomas LACOMBE

Machine Learning Engineer
(AI & Software)

EDUCATION

**École Nationale Supérieure des Mines de Saint-Étienne
(Top Engineering School) | 2022/2025**

MSc in Engineering (Civil Engineer of Mines)

Major in Data Science & AI – Mechanics Option

Semester at Seoul National University | 2023

International exchange in South Korea: Mathematics, programming, robotics, finance courses.

Intensive Engineering Prep Classes (PTSI-PT*) | 2020/2022

Lycée Vaucanson, Grenoble – University preparatory classes

High School Diploma in Science, with honors | 2020

EXPERIENCE

Dassault Aviation | Data & AI Engineering Intern

Saint-Cloud – March to September 2025 (6 months)

- Implemented AI projects within the purchasing dept: RAG, classification, data analysis, OCR, LLM, VLM...

JE - Mines Études et Projets | Project Manager

Saint-Étienne – 2023/2024 Term

- Managed projects, supervised teams, handled client relations.

MGF Grimaldi | Methods Engineering Intern

Grenoble – Summer 2024 (3 months)

- CAD, technical drafting and prototyping (3D printing)...

PROJECTS

Personal Project | Music Application - Dev & AI

Paris – May 2025 to Present

- Developed in React, set up backend architecture, and tested recommendation algorithms (similarity, clustering).

Thales | Industrial Project (École des Mines)

Saint-Étienne – Sept. 2024 to Jan. 2025

- Created and trained an image classification AI model under constraints (CNN, PyTorch, TensorFlow).

Institut Fayol | Research Project (École des Mines)

Saint-Étienne – Jan. 2025 to March 2025

- Developed and trained a denoising neural network model (encoder-decoder architecture) using PyTorch.

Personal Project | Deep Reinforcement Learning

- Designed and trained an autonomous trading agent via Reinforcement Learning (PPO, PyTorch, Gym)
